Standing for...

Warm greetings to you all..!!

Give your valuable time out and go through my manifesto. Hope you would appreciate it and support me.

AGENDA

- Many of us are facing problems with drinking water in hostel (both quality and quantity). I had raised 2 tickets (ticket numbers #524742 & #513917) recently.
- In many floors there are many issues with the working of the washing machines, geyser and they are not getting resolved in time. I will send feedback form every week and address every issue to my best.
- All are struggling to reach saloons which are in Elippara & Kozhippara which are around 4-5 kms away, so I will make efforts to arrange the barber at respective hostel itself.
- We are also facing issues with the Wi-fi (disconnecting) .Since the routers are placed randomly and many of us are far away from them, we are not able to get good network speed. I will take this to the technical team and try to sort that out.
- We are also facing the issue of suffocation in rooms, since its not safe to open the windows at night (especially ground floor), I will try to explain the situation and ask the authorities to install the mesh doors for the windows (like few IITS).
- Every time we need to go to mess which is about 700m even to get coffee/tea, so I will make efforts to atleast arrange tea/coffee if possible snacks at the respective hostels itself which saves our time.
